EVENT SET-UP MADE SIMPLE: BURGESS FURNITURE LAUNCHES NEW SPACE-SAVING A-FOLD TABLE

Burgess Furniture has launched a new folding table that makes light work of setting up functions and events.

Portable and lightweight, the new A-Fold table is quick to install and fold down thanks to its unique folding mechanism, that secures the legs flat against the table top for minimal storage space.

Available in different styles, such as classic white, contemporary white and timber, the A-Fold table is designed with user flexibility in mind.

Individual tables can be linked together for business group working and modesty panels can be added or removed quickly for user comfort and discreet cable fixing.

The A-Fold table is available in rectangle or round shape and a comprehensive choice of sizes from 150 to 180cm diameter and 120 to 180cm in length.

Craig Kent, Production Director at Burgess Furniture, says: "Setting up an open area into a dining room, meeting room or conference space can be time-consuming and difficult. The new A-Fold table is designed to make it easy and quick to adapt a room when hosting different types of events.

"The folding mechanism was very carefully designed by our team, to be smooth, safe and simple so that anyone can set the A-Fold table up.

"It's a very practical solution that's also very stylish, each design was carefully created to ensure it complements existing décor for the professional, quality experience that guests expect."

The A-Fold table is the latest new product from innovative furniture maker Burgess, following on from the launch of its Smart Qube flexible hospitality furniture range and Junea chair collection earlier this year.

The A-Fold will be available from 1 July 2018. For more information visit www.burgessfurniture.com

About Burgess Furniture

Burgess Furniture is the UK's leading designer and manufacturer of high-quality chairs and tables for the hospitality sector.

With a rich heritage spanning over 60 years, the company has evolved from its roots in cycling, when founder Gerald Burgess spotted an opportunity for growth in the aluminium handlebars of bicycles to create the world-renowned Burgess stacking banquet chair.

Based at a dedicated factory in South West London with an in-house creative team, Burgess continues to push the boundaries of modern furniture design, producing on-trend, innovative solutions for its international client base.
